

## Santa Clara County Mental Health Board CLOSED Motions

Updated: 1/28/2011

Motion Number	MHB Meeting Date	Motion	Action	Assigned To	Status
<b>1</b>	07/13/09	At June’s Executive Committee meeting, Richard Alvarez motioned “That when the MHB Support Staff Position becomes open, the MHB recommends and endorse Llolanda Ulloa for the position”. Wes Mukoyama seconded, all unanimous in favor of motion. Chair Irwin endorsed; Hilbert mentioned getting it to the appointing authorities and Bruce asked to add “to the extent to follow civil service rules”. Tito Cortez moved and Victor Ojakian seconded.	Per county personnel policies and bargaining unit agreements, recruitment was initiated during the fall of last year. Applications were received, including Llolanda’s (she has been working out of class in the position). Position was frozen due to pending budget cuts the MHD. MHD continued to work with HR to advocate for approval to fill the position. 2/8/10 status: Llolanda was placed in the position effective 1/25/2010.	Pat Garcia	Closed
<b>2</b>	07/13/09	From the Minority Advisory Committee (MAC) which is recommending that clients with specific language needs who are currently receiving culturally linguistic and competent services, be allowed to remain with their cultural linguistic competent service provider. After conversation; Victor Ojakian requested to amend this motion to have Staff provide a report to the MHB and Tito Cortez asked that the report be provided to MAC first as it is where the motion started	A verbal staff report was given to MAC on October 20, 2009. All clients with specific language requirements have been matched where possible with providers that have the specific language capability. Specifically there were several Russian Speaking consumers that were transferred from Central Mental Health Clinic to Momentum for Mental Health where there was bilingual Russian speaking staff. A written report will be submitted at the November MAC meeting. 2/16/10 Status: Informational report was provided at 2/16/10 MAC meeting. Recommend to <u>remove</u> this motion <b>from agenda</b> as it is closed.	Bruce Copley	Closed
<b>3</b>	05/11/09	The MHB would like MHD to take a second look at funding for the uninsured clients at existing clinics, (East Valley, North County, Palo Alto, and Contract Agencies) in order to prevent displacement of their treatment.	Pursuant to action taken by the Board of Supervisors during the FY10 Budget Hearings in June 2009, the Mental Health Dept. has implemented all required steps to make necessary budget-related changes and client transfers. While no clients of the system were eliminated from service, approximately 1200 clients without insurance were transferred to the new Uninsured Clinic located at Central Mental Health Center on the VMC campus. New benefit assistance staff have been assigned to the clinic and all staff are working diligently to support clients in seeking benefits for which they are eligible. 3/8/10 Status: The MHD re-examined the staffing for the “Central Wellness and Benefits	MHD Staff  <a href="#">Recommend this be closed.</a>	Closed

			Assistance Center” and increased funding for it as part of its FY09-10 plan. <b>Closed 7/27/10</b>		
4	03/09/09	That information/data be collected by the Data Committee which gives the cost of a relapse and compares that cost to the treatment of a client in general care without a relapse. This will allow the department to understand how prevention and intervention programs can mitigate cost and minimize symptom exacerbation. A case study without any patient identification can be used to show how patients are moved through the system during acute episodes	In response to the motion, the Decision Support staff undertook an initial analysis which looked at the cost of an IMD relapse as compared to outpatient FSP costs. Staff estimated the costs for services based on the average annual case rates. Staff continues to work with Finance staff to determine appropriate cost estimates which will serve as an “average IMD relapse cost”. A file consisting of 10 IMD relapse clients and 10 Non-relapse clients has been created and will be used to compare treatment costs over 2 fiscal years. A report will be provided at the next MHB meeting as a follow up report, the IMD Report presented to the MHB on 11/09/09. <i>6/13/10 Status: Several follow-up reports have been provided and is still in progress. Closed 7/27/10</i>	Deane Wiley	Closed
5	02/09/09	Within the Adult System of Care planning it must be recognized that Prevention and Early Intervention, <b>also</b> pertains to relapse prevention and minimizing symptom exacerbation.	Inherent in the philosophy of the Adult Redesign is the concept of relapse prevention in the framework for delivering wellness and recovery services. The adoption of the Milestone of Recovery Scale (MORS) provides a standard process for assessing the functioning of the consumer. When the MORS indicates that a consumer is experiencing stress and risk of mental health symptoms increasing, the provider is expected to address the issues through discussing with the consumer the immediate stresses, and increasing levels and variety of services that will mitigate the symptoms. The MORS instrument allows for a more formal tracking of “relapse risk” among clients. The Performance Evaluation Steering Committee will be asked to incorporate the tracking of “relapse” following finalization of an operational definition established by the Committee.  The PEI component of the Mental Health Services Act (MHSA) cannot fund services that prevent relapse or minimize symptom exacerbation in individuals already diagnosed with a severe mental illness and being served in the system. Within this framework, the County’s PEI plan employs various strategies to minimize the impact of mental	Bruce Copley / Ky Le	Closed

			<p>health problems early in their manifestation. However, the PEI guidelines make an exception for individuals experiencing At Risk Mental State (ARMS) or First Onset of a Serious Psychiatric Illness with Psychotic Features (diagnosis within previous 12 months). Project 3 of the County's PEI plan is intended to result in focused continuum of primary and selective prevention and early intervention services to address the onset of serious psychiatric illness, with psychotic features, with the goals of improving mental health and functioning in all life domains and reducing suicide risk. This project focuses on transition age youth (TAY), but will serve the entire lifespan. Pursuant to the PEI guidelines, services for these individuals may last up to five years. During the individual's time with the program, staff would strive to prevent First Onset and/or prevent relapse.</p> <p>2/8/10 Status: Bruce Copley &amp; Ky Le met with Margene Chmyz around April 2009. 4/27/10 Ms. Chmyz requested this motion be closed.</p>		
7	1/11/10	Jackie Gutierrez so moved, the MH Board proposes to urge the Mental Health Department to increase the capacity to respond in the community through the design and implementation of an Urgent Outreach Mobile Service." Cheryl Crose seconded. <u>VOTE</u> : Passed unanimously.	6/21/10 Update: <i>"MHD will provide a plan for development of an information table within MHUC pending the redesign of hour of operation and staffing changes within the new budget plan.
