

# Perinatal Substance Abuse Program

## What is PSAP?

The Perinatal Substance Abuse Program (PSAP), provides comprehensive outpatient services for the treatment of pregnant and parenting women with substance use disorders.

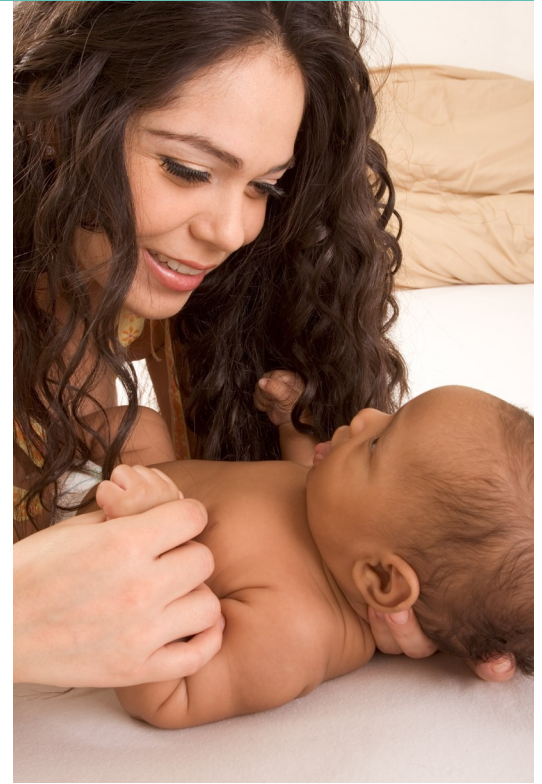

Because each woman is unique, the treatment team at PSAP creates an individualized program designed to address her specific needs.

## Our Mission

To help pregnant and parenting mothers with substance use disorders achieve and maintain abstinence from substance use – promoting healthy babies and helping moms achieve their hopes, dreams, and quality of life goals.
